

Bole

Designer

Tania da Cruz

The Bole is both a stool and side table in one, made out of expanded cork which has minimum impact on the environment.

DeVorm

Expanded cork

Expanded cork is 100% natural and recyclable, has good acoustic- and isolating qualities and is lightweight.

Cork is an eco-friendly solution in producing furniture. To use cork, it is not necessary to cut down trees.

The cork is stripped and will grow back on the tree. Every 9 years it is possible to strip the trees, which will live for approximately 100 years. In the expanding process the cork gets more volume, which results in using less cork.

Measurements

Weight - 9,5 kg

Carton box - 40 x 40 x 51,5 cm; 0,08 m³

Eco-friendly

100% Bio-based

Acoustic performance

DeVorm

We create interior products by today's standards.

De Vorm is established in a new era, we develop products by the standards of today. This means we produce efficiently, use the full lifecycle of products and eventually give them a new life.

Our emphasis lies on making a product that works, by setting a variety of conditions; it should be legible, accessible, but also environmental friendly and aesthetically perfectly in balance.

We like a product because of its functionality.

A good product makes life easier - it should be developed for helping us function better throughout the day. We firmly believe that the beauty of a design lies in the sum of functions that makes it a complete product.

We continuously raise the bar.

From the very first sketches we start combining and developing new techniques to find new possibilities to innovate. Our design process is infused with technical development; techniques result in aesthetic features and the other way round.
